

PUT A STOP TO NOT STOPPING!

THE EXTENDED STOP ARM

The Extended Stop Arm places a traffic barrier in the School Bus Safety Zone. It has been proven to reduce dangerous stop arm violations by up to 90%. It is the only safety device that can be added to the outside of the school bus that increases student safety.

WHY AN EXTENDED STOP ARM?

Thousands of people illegally pass stopped school buses every day. In the United States this amounts to over 14 MILLION Stop Arm Violations annually. Too many children are killed or seriously injured due to Stop Arm

BUS COMPATIBILITY

The product is designed to work with any model school bus. Our product is installed in nine states that have included International, Blue Bird, Thomas, and Freightliner model buses, including buses that are over 20 years old.

EXTREME TEMP

Certified operation between -30 F and 130 F. (Keep your kids home outside these temps!)

LIGHTS

The lights are high visibility LED lights with an enhanced strobe pattern. Lights are individually replaced with a pin connection, thus saving money by not having to replace all the lights as is the current practice.

OPTIONS

Pneumatic Cylinder or Electric Actuator models available.

CORROSION RESISTANT

All metal parts are stainless steel or powder coated to withstand harsh elements and road chemicals.

SHOCK AND VIBRATION

Rough road, potholes and day-to-day jarring are no match for our durable parts.
